

Why Invest in **TIGRcubs™**?

The Security for the Real Economy

TIGRcubs™ are the institutionalization of a security that has been around for centuries. A TIGRcub™, or Top Line Income Generation Rights Certificate, is a contract to "own" a piece (percent) of the top line, or revenue, of a company for a designated period of time.

TIGRcubs™ were originally conceived to establish an investment vehicle for private companies with between \$5 and \$250 million in annual revenue: companies that have inefficient access to capital. The financial community quickly recognized the implications for the public and venture markets and have established numerous funds and instruments around varied market sectors.

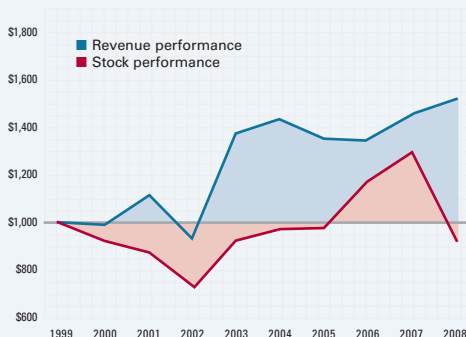

TIGRcubs™ provide investors with:

- An Inflation hedge
- A piece of the top line
- A monthly cash return
- A high-yield annuity

Dow Jones Industrial Average (DJIA) Companies

\$1,000: Revenue Performance vs Stock Performance
10-year Study

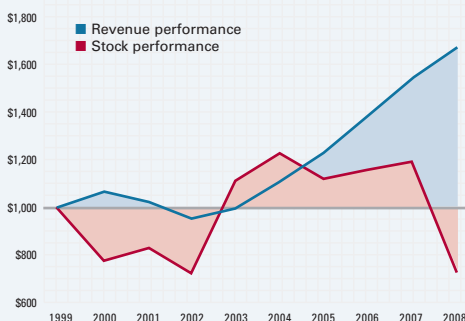

The Dow Companies Stock versus Revenue

10 year revenue performance can be non-correlative to stock activity in periods of extreme volatility.

Entrex Micro Cap Revenue Index (EMRI)

\$1,000: Revenue Performance vs Stock Performance
Top 50 Compliant Micro Cap Public Companies
10-year Study

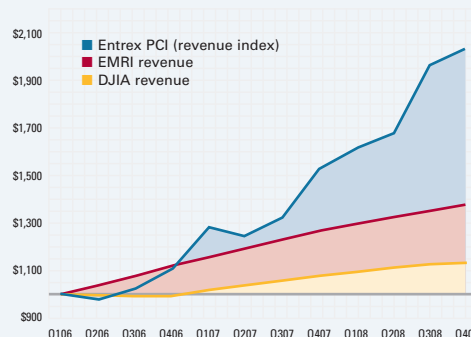

OTC Companies Stock versus Revenue

10 year stock price has shown a great deal of speculative volatility compared to revenue performance.

Entrex Private Company Index (PCI)

\$1,000: Performance on Quarterly Index Movement
As compared to DJIA and EMRI

Private Companies versus Public Companies

Three year private company revenue index outperforms public company revenue growth.
